

Reasoning Defeasibly by Cases

Montreal Logic Workshop 2017

Christian Straßer (joint work with Mathieu Beirlaen and Jesse Heyn-
inck)

March 6, 2017

We have, e.g., the arguments:

- $a_1 = \langle q \rangle, a_2 = \langle r \rangle, a'_3 = \langle t \rangle$
- $a_3 = \langle \langle t \rangle \Rightarrow \neg s \rangle$
- $a_4 = \langle \langle q \rangle \Rightarrow s \rangle$
- $a_5 = \langle a_4 \Rightarrow v \rangle$
- $a_6 = \langle \langle r \rangle \Rightarrow u \rangle$
- $a_7 = \langle a_6 \Rightarrow v \rangle$
